

Psychological Apparatuses Experimental Materials Tests & Books

Rupa Psychological Centre

Manufacturer, Publisher and Supplier

📍 Bhelupur, Varanasi

Content

1. Sensation and perception	3-5
2. Learning and conditioning	5
3. Memory & problem solving	5-7
4. Attention, suggestion & emotion	7-8
5. Experimental aesthetics	8
6. Reaction time	8
7. Work fatigue & respiration	8
8. Recording apparatus	9
9. Achievement & aptitude tests	9-11
10. Adjustment, interest & values test	11-13
11. Intelligence test verbal performance	13-15
12. Concept formation tests	16
13. Clinical tests	16-19
14. Personality tests	19-26
15. Situational & projective tests	26-28
16. Motor - perceptual skills tests	28-31
17. Social phenomena / attitude tests	31-37
18. Neuropsychological tests	37-38
19. Organizational behaviour / variable area	38-39
20. Accessories	39
21. Miscellaneous materials	40
22. Educational & psychological charts	40

1. Sensation and Perception

1. **Aesthesiometer (Divider type):** Two point, graduated aesthesiometer, all metal electro-plated.
2. **Three-point Aesthesiometer** (Lafayette model): Similar to Vernier's Calipers with a third point added to give the instrument more flexibility. Use of (Age group 2½ to 18 years) the Three-Point Aesthesiometer is simplified by alternating the single and double points, therefore, eliminating the need to readjust the two-point threshold sensor after every trial.
3. **Needle Holder Aesthesiometer:** For measuring pain spots.
4. **Hair Aesthesiometer:** All metal body. This aesthesiometer is required to locate touch points.
5. **Autokinetic Movement Apparatus:** A simple device of autokinetic movement. Different intensities of light can be used. This apparatus can be fixed on a blackboard or a stand or hanged.
6. **Colour Mixer (also called colour wheel):** Electrically operated. Variable speed. Used for study of visual phenomena of colour perception of complementary and non-complementary colour development.
7. **Colour Mixer with Light:** Other qualities as above.
8. **Colour Mixer:** Electrically operated. Fixed speed.
9. **Colour Contrast Apparatus:** Different colour plates are used to show the phenomenon of colour contrast. An indispensable apparatus to introduce the said phenomenon.
10. **Colour Discs:** A set of 8 colour discs. All metal, most durable.
11. **Colour Discs:** A set of 6 colour discs, all metal, most durable.
12. **Colour Mixing by Light :** Half silvered mirror. Electrically adjusted. No need of separate discs.
13. **Campimeter:** (Stoelting Model) with stand and metric scale. Used for measuring the length and width of the blind spot.
14. **Successive Contrast or After Image Apparatus :** The phenomenon of after image can be studied. The apparatus is handy, well furnished and provides all materials required for studying the said phenomenon.
15. **After Image Plates:** All metal (a set of six).
16. **Hering's Colour Papers :** For studying simultaneous and successive contrast.
17. **Depth Perception Apparatus:** The box with 3 needles provides enough room for studying the depth perception with electric bulb.
18. **Lifted Weights Set (Metal):** A set of 12 metal tubes with removable or fixed tops containing certain weights. Fine finish and superior quality. This is required in weight discrimination experiments in psychophysics for differential limen (DL), upper differential limen (UDL), lower differential limen (LDL) determination.
19. **Lifted Weight Set (Wooden):** A set of 12 wooden tubes with air tight caps containing certain weights. Other qualities as above.
20. **Muller-Lyer Illusion Figure (with stand & scale):** A study and handy set of Muller Lyer Illusion figure. Horizontal type with stand to adjust the figure to the desired eye level of the subjects. Variable figure operated by smooth sliding of the figure (in front of the Experimenter) on an attached mm scale. Fine finish and superior quality of work (20°).
21. **Muller-Lyer Illusion Figure (with stand & scale):** both 20° + 40°.
22. **Study of Muller-Lyer Illusion Scale** (A pkt. of 100)
23. **Answer sheets for Muller-Lyer Illusion** (A pkt. of 100)
24. **Size-Weight Illusion** A set of 12 Metal Tubes.
25. **Size-Weight Illusion** (Collins-Drever Model) A set of 12 tubes with two standard stimuli

- of different weights. Fine finishing and superior quality. Supplied in a wooden handy box.
26. **Vertical Horizontal Illusion:** T and L forms with stand and scale.
 27. **Optical Illusion Chart:** Cloth bound showing fifteen well known illusion, five each of extent, direction and perspective.
 28. **Perimeter (Table Model):** Used for mapping the retinal colour zones in human subjects.
 29. **Perimetric Chart** (A packet of 100).
 30. **Hand Perimeter:** hand operated instrument for mapping retinal colour zones in human subjects.
 31. **Phi-Phenomenon Apparatus:** Consists of two lights holding small cabins with variable positions and time exposures. Requires mercury cup metronome also, if an automatic operation of the apparatus is desired.
 32. **Dark Adaptation Apparatus:** Comprises a box through which light adaptation is done by means of a high intensity bulb first and then the intensity of a second electric bulb is minimally increased. The phenomenon of darkness adaptation can be demonstrated and a threshold of the same can be obtained.
 33. **Perceptual Grouping Cards:** A set of two cards to evince perceptual grouping.
 34. **Perceptual Grouping Apparatus:** Electrically operated. This device uses small electric bulbs and the order of lighting them yields the perceptual grouping phenomenon.
 35. **Perception-Influence of Set:** Two sets of 12 cards, each of which contains a pair of geometrical figures. One series introducing a set and the other serving as an experimental series ideal for studying influence of set.
 36. **Visual Space Perception Apparatus:** Consists of well polished wooden box (size: 30"x12"x19"). Having two fixed lights and a third movable one with slides in the box perpendicular to the plane formed by the two fixed uprights. A fixed scale on top of the box enables one to find errors. The inside of the box is illuminated by means of two lamps. Viewing slit is provided on the smaller end.
 37. **Vase and Face Figures:** In 5"x 5" size on sturdy, imported card board.
 38. **Geometrical Figures:** Different types of geometrical reversible perspective figures; same size figures on same size paper board as above.
 39. **Temperature Cylinders:** All metal with ebonite handle to prevent radiation of heat. These cylinders are used for locating hot, cold and paradoxical hot and cold spots (Centigrade thermometer and other accessories, like water boiling tray, ice- container are also available).
 40. **Galton Bar:** It is one of the early but still very popular psychophysical experiments to demonstrate the problems of subjective (psychological) equality.
 41. **Whipples Weight Box:** Consists of 2 standard and 20 comparison weights. The weights are made out of light metal and not of card board as made by some foreign firms. Supplied with an attractive box lined with velvet to hold weights in individual compartments.
 42. **Brightness Discrimination Apparatus:** This apparatus consists of two electric bulbs, one controlled and the other of variable intensity. The intensity of the second bulb can be minimized by operating a knob which can also be noted by the experimenter on the scale. Electrically operated on AC mains.
 43. **Kinaesthetic Figural After Effect Apparatus** (Marietta, USA Model): This device is used for research in the active area of kinaesthetic figural after effects. In addition to KFAE work it may also be used demonstrationaly, e.g., in tests on the method of adjustment or in any situation in which tactual perception of a stimulus object is of interest.
a) Manual available
 44. **Shape and Size Discrimination Apparatus:**

(T.K.K. Japan Model) This device examines the subject's size discrimination ability relying upon visual and tactile sensations as well as speed of shroting. The subject inserts 50 small discs or coins. Which are different in size and thickness in five different ways, into the corresponding slit of holes as fast as possible. The practice is allowed only five times and the test is repeated twice.

45. **Paired Comparison Study** by N.K. Jain (Hindi/English): In this study lists of paired vegetables are provided with instruction to choose a vegetable if one is asked to show one's preference. The obtained data are analysed as per instructions in the manual.
 - (a) Paired vegetable sheets (A pkt. of 100)
 - (b) Manual
 46. **Colour Preference Cards:** A set of 8 cards of different colours. Can be exposed through gravity tachistoscope
 47. **Colour Preference Wheel:** Used for colour preference. Using pair by pair comparison method colour preference wheel is operated.
 48. **Colour Preference Wheel** (Electrically operated): Other qualities are as above.
 49. **Form Preference Cards:**
 - i) A set of 8 cards of two dimensional form of the same length.
 - ii) A set of 8 cards of two dimensional forms of varying lengths but of same breadth.
- ## 2. Learning and Conditioning
50. **Conflict Board:** With step down transformer and a pad of 84 sheets along with manual for demonstrating experimentally the reactions to (1) Approach-Avoidance, (2) Approach-Approach, (3) Avoidance-Avoidance and (4) Double Approach-Avoidance situations.
 - a) Manual available
 51. **Card Sorting Square Tray:** A 4"x4" square tray has been specially designed to eliminate space error on changing the position of the tray. The pigeon-hole numbers can be changed into four different patterns simply by changing the position of the movable plywood back of the tray, fine finish and superior quality work.
 52. **Card sorting 4"x 3" Tray:** Other qualities as above.
 53. **Card Sorting 3"x 3" Tray:** Other qualities as above.
 54. **Card Sorting 4"x 2" Tray:** Other qualities as above.
 55. **Electric Maze (Human Maze):** Two designs on the same maze (one for the experimenter and the other for the subject alternately). Teak wood, light or sound signals for counting errors. Impulse counter can also be used. Specially planned according to the designs of the mazes to plot the procedure and progress of learning from trial to trial. 420 points. With Manual.
 - (a) Ebonite stylus
 - (b) Electrically operated
 - (c) Electrically with 6 digits error counter
 - (d) Electronics with digital timer & counter.
 - (e) Record Blanks. For mazes 1 and 2, (A pkt. of 100)
 56. **Electric Maze with Stylus (Human Maze):** Finished with good polish, having 219 contacts and a binding post. Supplied with stylus.
 57. **Punch Board Maze:** A new type of experimental design for learning, showing influence of knowledge of results as well. Made of teak wood using paper record sheets.
 58. **Punch Board Maze:** Electric with 6 digits Error Counter operated. Other qualities as above, with stylus.
 59. **Punch Board Maze** (Electrically operated): Other qualities as above, with stylus.
 60. **Verbal Maze** (in Hindi): Booklets for the

study of learning, using verbal materials. A packet of 50 with instruction sheets.

(a) Form A

(b) Form B

61. **Finger Maze:** All zinc metal, operated by finger or stylus. Elevated path, two types, superior quality and fine finish.
62. **Stylus : For the above.**
63. **Learning by Recognition Method:** A set of 35 cards with instruction sheets.
64. **Slot Maze:** Designed, completely controlled pathways in direction to eliminate bias. Stylus is used. Fine quality and excellent finish.
65. **Substitution-Letter Digit Sheets** (Hindi/English): (A pkt. of 100)
66. **Maze : Three dimensional.**

3. Memory and Problem Solving

67. **Jastrow's Memory Apparatus:** Exposure device for memory experiment. Can be used for exposing longer material also by the help of windows. With Manual:
68. **Memory Drum:** Electrically operated, four variable speed, high quality.
69. **Memory Drum:** Hand operated, with Manual.
70. **Immediate Memory Span Test:** (Hindi/English):
 - (a) Form A (A pad of 100)
 - (b) Form B (A pad of 100)
 - (c) Manual
71. **Mirror Drawing Apparatus:** Size 15"x 12" x 3/4" folding type. Plywood surface with hard plastic base to assure smooth movement of the stylus on which the metallic pattern is fixed. For the electrical operation, over all body is made of plywood. With Manual:
 - (a) Electrically operated
 - (b) Electrically with 6 digits error counter
 - (c) Electronics with digital timer & counter.
72. **Extra Stylus:** For the above.
73. **Mirror Drawing Apparatus:** For hand oper-

ation with 100 star sheets.

74. **Mirror Drawing Apparatus:** For hand operation, with a wooden cover and star sheets.
75. **Knowledge of Results** by N.K. Jain:
 - (a) Manual
 - (b) Test sheets for correct knowledge of result condition (a pkt. of 100)
 - (c) Test sheets for partially correct knowledge of result condition (A pkt. of 100)
 - (d) Test sheets for controlled condition (A pkt. of 100)
 - (e) Record sheets (A pkt. of 100)
76. **Short-Term-Memory Test** by C.B. Dwivedi (Hindi/English):
 - (a) Manual
 - (b) Cards of CCC trigrams (A pkt. of 15)
 - (c) Cards of meaningful triads (pkt. of 15)
77. **Long-Term Memory Test** by C.B. Dwivedi (Hindi/English):
 - (a) Manual
 - (b) List of words for Recognition Test (A pkt. of 100)
78. **Mechanical Puzzle:** Made of brass wire. A ring is either to be taken out of or to be put in another ring. May be used to demonstrate the efficiency in learning a problem and also in problem solving.
79. **Pyramid Puzzle:** The pyramid problem involves placing a series of graduated blocks on one of three posts such that a larger block is never placed over a smaller block. Useful for demonstration of problem solving. Insight learning and concept formation. Average solution time with new subject is about 20 min. Repeated trials with same subject will produce successively shorter solution time.
80. **Record sheet for the pyramid Puzzle:** (A pkt. of 100)
81. **Correct Solution of Goals, Sub goals and moves for pyramid Puzzle:** (A pkt. of 100)
82. **T-Puzzle:** For problem solving studies. All made up of plastic, superior quality and fine

- finish.
83. **M-Puzzle:** For problem solving studies. All made up of plastic, superior quality and fine finish.
 84. **E-Puzzle:** For problem solving studies. All made up of plastic, superior quality and fine finish.
 85. **Hand Withdrawal Apparatus:** For studying the conditioned response experiment. Does not require any accessory except a triple time marker with manual.
 86. **Star Pattern Figures:** Equidistant six-point star pattern figures. In order to keep the task similar and to keep the distance equal within each of the five and six-point patterns, these have been so designed as to be exactly equal (500 sheets).
 87. **Yerkes Multiple Choice Apparatus:** It provides eleven points of signals choice to be decided by a multiple selection knob.
 88. **Pyle Marble Sorting Apparatus.**
 89. **Pyle card Sorting Tray with Cards.**
 90. **Habit Interference Board with Cards.**
 91. **Two-Arm Tracing Apparatus** (Marrietta, U.S.A. Model): Electrically, operated. The two-arm tracing apparatus provides a psychomotor task which involves coordination of both arms with respect to the work area.
 92. **Conditioned Reflex Apparatus:** A thick glass plate is fixed in a wooden frame to which is attached a felt hammer. The hammer when released will fly up and strike the glass in front of the eyes of the subject. This is attached to head rest and can be adjusted to any height. The apparatus is mounted on a table by means of clamp supplied with it. Used for eyelid conditioning experiment.
 93. **Temporal Maze:** Comprises two mazes. A stylus is fitted with the knob. Appropriate switching of the tackling switch operates either of the two mazes. The errors can be recorded by the sound of the buzzer. Teak wood, fine finish.
 94. **Pencil Maze:** A durable aluminium maze with a hard surface bottom to prevent grooving. Standard 8.5"x11" paper placed under the maze produces a permanent record of subject's performance. Can be used for a variety of learning problems. Subjects are blind folded when tracing the maze. Speed as well as accuracy can be studied with the aid of a stop watch or clock timer.
 95. **Automatic Tally Maze:** This durable aluminium maze has the pattern identical to the Pencil Maze. Provision has been made to automatically tally error scores. Subjects are blind folded to complete the maze. Number of errors, number of trials to reach a perfect score, or any combination of the values can be recorded. Counter may also be used.
 96. **Reversible Pencil Maze:** The reversible pencil maze consists of an anodized aluminium maze with a handsome wooden tray. The maze lifts out of the tray to change paper of reverse maze. Maze may be reversed left and right and turned upside down to obtain mirror image. Tray will hold standard (8.5"x11") paper used to produce a permanent record of performance. Subjects are blindfolded during testing. Speed as well as accuracy may be recorded with the aid of a stop watch or clock timer.
 97. **Human Problem Solving** by C.B. Dwivedi (Hindi/English): With instructions, design of experiment and calculation procedures. May also be used for studying the influence of set on problem solving.
 - (a) Booklet : (i) 30 problem work sheets (A Pkt. of 100)
 - (ii) 6 problem sheets for studying the influence of set (A pkt. of 100)
 - (b) Manual
 98. **Human Problem Solving by Anagrams:**
 - (a) Test Sheets (a pkt. of 100) List-1
 - (b) Test Sheets (a pkt. of 100) List-2
 - (c) Manual

99. **Water-Jar Problem Solving Test** by N.K. Jain: A series of 15 problems illustrated jar wise. This is ideal for studying problem solving in real-life setting. Four problems introduce the situation followed by difficult ones. To be used for studying effect of set on problem solving
(a) Test Booklet (A Pkt. of 100)
(b) Manual
100. **Tripathi's Water Jar Problems** by R. Tripathi. For problem solving (Hindi):
(a) Manual
(b) Samasya (A Pkt. of 50)
(c) Samadhan (A Pkt. of 50)
(d) Abhilekh Patra (A Pkt. of 100)
101. **Nonsense Syllables or Meaningless Word Lists** (English/Hindi): from 3 to 11 syllables. Printed on white paper and also in list form (Set of 3 pads).
102. **Paired Associates Word Lists** (English/Hindi): From 2 to 6 words. Printed on separate sheets (Set of 4 pads).
103. **Meaningful Word Lists** (Hindi/English): (a pkt. of 100)
104. **Verbal Conditioning Experiment** (Hindi):
(a) Cards (A set of 100)
(b) Answer sheets (A pkt. of 100)
(c) Manual
105. **The Study of Zeigranik Effect** by K.B. Verma (Hindi/English):
(a) Test Booklets (A pkt. of 100)
(b) Manual
106. **Cup and Ball**
107. **Shock Box**: To be used as a source of shock as punishment.

4. Attention, Suggestion and Emotion

108. **Masson's Disc**: Used to study the fluctuations of attention.
109. **Masson's Disc on Motor**: With screen and special lighting arrangements, fixed speed.

110. **Masson's Disc on Motor**: Variable speed with light.
111. **Masson's Disc on Motor**: Variable speed. (Not Covered).
112. **Span of Attention Cards**: A set of 12 cards having equal sized dots (from 3 to 14) scattered randomly. With instruction sheet.
(a) Answer Sheet (A pkt. of 100)
113. **Dot Figures**: Same dot figures are used in studying the phenomenon of attention.
114. **Tachistoscope(Jalota-gravity Type)**: Tachistoscope with three different adjustable windows. The tachistoscope when unfolded provides an automatic screen between the E and S. All teak wood, fine gray paint or polish. With Manual.
115. **Tachistoscope(Fall type)**: Can be used for the study of span of apprehension and memory. All teak plywood made, fine polish or gray paint. Smooth and comparatively noiseless operation attempted.
116. **Tachistoscope (Electronics type)**
117. **McDougall's Disc Apparatus**
118. **Judging Emotions from Photographs**: A set of 12 photographs.
119. **Division of Attention Board Apparatus**: Electrically operated with error counter.

5. Experimental Aesthetics

120. **Colour Preference Cards**: A set of 8 cards of different colours. Can be exposed through gravity tachistoscope.
121. **Colour Preference Wheel** : Used for colour preference. Using pair by pair comparison method colour preference wheel is operated.
122. **Colour Preference Wheel** (Electrically operated): Other qualities are as above.
123. **Form Preference Cards**:
i) A set of 8 cards of two dimensional forms of the same length.
ii) A set of 8 cards of two dimensional forms of varying lengths but of same breadth.

6. Reaction Time

124. **R.T. Apparatus:** Giving choice R.T. using two light stimuli.
125. **Vernier Type Chronoscope:** Specially made of heavy bottom (all metal) to prevent any accidental movements.
126. **R. T. Apparatus:** Giving simple R.T. for light stimulus.
127. **R. T. Apparatus:** Giving choice R.T. using three lights.
128. **R. T. Apparatus:** Giving choice R.T. using four lights.
129. **R. T. Apparatus:** Giving choice R.T. using five lights.
130. **R. T. Apparatus:** With Vernier's Chronoscope. Combined with three lights.
131. **Manual of Directions:** For conducting R.T. experiments using above choice apparatus. N.B.: For the measurement of R.T. Vernier's Chronoscope is also required along with the above R.T. Choice Apparatus.

7. Work, Fatigue & Respiration

132. **Ergograph:** With recording drum.
133. **Mental Fatigue Test** by N.K. Jain (Hindi/English): with instruction sheet.
(a) Numerical Sheets (A pad of 100)
(b) Alphabetical Sheets (A pad of 100)
(c) Instruction sheet
134. **Mental Fatigue Test** by D.D. Joshi (Hindi):
(a) Test sheets (A Pkt. of 100)
(b) Scoring Key
(c) Manual
135. **Work and Rest Test** by M.C. Joshi (Hindi/English):
(a) Alphabetical Sheets : Form A for work (A Pkt. of 100)
(c) Numerical Sheets : Form A for work (A Pkt. of 100)
(c) Manual

8. Recording Apparatus

136. **Kymograph:** Standard Sherrington Sterling model with a 6"x 6" drum driven by an externally geared motor with a metal cover.
137. **Varnishing Tray:** With clips.
138. **Drying Frame:** For using with kymographs.
139. **Normal Curve Demonstration Apparatus** (Laffayate Model): This is an effective visual demonstration device for showing the natural normal distribution curve and illustrating a graphic picture of the law of probability. Marbles should be inserted through the hopper to a preset but adjustable position to produce the Normal Distribution Curve. This unit is ideal both for demonstration in statistics classes as well as for those experiments requiring assessments of normal probability phenomena by the subject. Instruction manual is also available.

9. Achievement and Aptitude Tests

140. **Educational Philosophy Achievement Test (EPAT-II)** by Kalpalata Pandey & Meena Srivastava (Hindi): The test consists of 75 items divided into three sections. The first part contains 60 items of multiple choice type of questions having one stem question, one correct answer with three distracters. The second section consists of 5 matching type questions whereas third section consists of 10 very short answer (one word answer) type of question.
(a) Test booklets (A pkt. of 20)
(b) Manual
(c) Scoring key
(d) Answer sheet (A pkt. of 100)
141. **Educational Psychology Achievement Test (EPAT-I)** by Kalpalata Pandey & Meena Srivastava (Hindi): The test consists of 75 items divided into three sections. The first

part contains 65 items of multiple-choice type of questions having one stem question, one correct answer with three distracters. The second section consists of 5 matching type of questions whereas third section consists of 5 very short answer type of questions.

(a) Reusable Test booklets (A pkt. of 20)

(b) Manual

(c) Scoring key

(d) Answer sheet (A pkt. of 100)

142. Study Habits and Attitude Test by M.C.

Joshi & Jagdish Pandey (Hindi): This Hindi adaptation of Brown and Holtzman's Survey of Study Habits and Attitudes carries 75 statements all rendered in first person. The statements cover the areas of place of study, comprehension, taking down of notes, method of answering examination paper, amount of time for study, selection of subjects, and preparedness. This adaptation has suggestible criterion, content and predictive validity and is a reliable measure. Tentative norms in terms of P.E. scores have been provided.

(a) Reusable Test Booklet (A Pkt. of 20)

(b) Answer Sheets (A Pkt. of 100)

(c) Manual

(d) Scoring Key.

143. The Kingston Test of Silent Reading by

M.E. Heborn (M.E. Highfield): For ages 7-11, Time: 20 Min.

(a) Test Form (A Pkt. of 25)

(b) Manual

144. Substitution Test (Hindi/English): Object symbol substitution tests for studying efficiency (A pkt. of 100).

145. Laipik Abhiyogata Parikshan (Clerical

Aptitude Test) by Kiran Gupta (Hindi): This is a battery of clerical aptitude test in Hindi. It provides seven separate measures of job involved in clerical work, viz., intelligence, numerical ability, language usage, classification, filing, copying & hecking. Each of these tests is separately timed. The entire testing session takes 2 h and 15 min. Sepa-

rate answer sheets are provided to answer the various tests of the battery, while the test booklet is reusable. The battery is suitable for use with both the sexes. Useful in a scientific selection and for promotion of clerks. It may as well be used for vocational guidance and counselling purposes.

(a) Reusable Test Booklets (A Pkt. of 20)

(b) Manual

(c) Answer Sheets (A pkt. of 100)

(d) Scoring Key (A set consists of 4)

146. Nagarik Shastra Yogyata Parekshan (Civics Achievement Test) by Durga

Srivastava (Hindi): For high school classes. This test may be used for prediction of success in examination; promotion and classification of pupils; educational and vocational guidance and comparison and selection of students for higher education. The test has a time limit of 50 min. This test of 125 items consists of five sub-tests. High marks on this test indicate a higher level of achievement while a low score is indicative of a lower level of achievement.

(a) Reusable Test Booklets (A pkt. of 20)

(b) Answer Sheets (A pkt. of 100)

(c) Manual

(d) Scoring Key

147. Achievement Test in Home Science by

Indira Kapoor (Hindi): For Class X students. The test has three elements; physiology, hygiene and household management. It has high reliabilities of split-half, test-retest and the rational equivalence types. The validity has been ascertained against the criterion of examination scores and against the criterion of teachers' judgement. Three types of norms have been provided : Percentile, tannine and T-scores.

(a) Reusable Test Booklets (A pkt. of 20)

(b) Manual

(c) Answer Sheets (A Packet of 100)

(d) Scoring Key (A set of 4)

- 148. Test of Quick Understanding** (Hindi/English): Test Sheets (A pkt. of 100).
- 149. Hindi Achievement Test** by Kalplata Pandey: This test measures achievement in Hindi among Junior High School students. It provides a measure of the comprehension, analysing, synthesizing and other abilities that persist in the students. Test is divided into 2 parts. The first part contains 20 multiple choice items having one item questions, one correct answer with three distractors. In the second part 7 major item questions are of short answer type. All the three objectives, viz., knowledge, understanding and application have been given emphasis in the ratio of 4:2:4, respectively. Test duration is of 40 min. It has split half reliability modified by K.R. 20 of 0.68. It has high content validity. Percentile norms have been provided.
 (a) Reusable Test Booklets (A pkt. of 20)
 (b) Answer Sheets (A pkt. of 100)
 (c) Manual
 (d) Scoring Key
- 150. Tower of Hanoi with Five Disks:**
- 151. Achievement Test in Mathematics for Primary School Children** by M. Asthana & K.B. Verma (Hindi):
 (a) Test Booklets (A Pkt. of 100)
 (b) Manual
- 152. The Need for Achievement Motivation Scale** by Aradhana Shukla (Hindi):
 (a) Test Booklets (A pkt. of 100)
 (b) Manual
- 153. Achievement Motivation Scale** by O.P. Mishra & S.K. Srivastava (Hindi/English):
- 154. Teaching Aptitude Test (T.A.T.)** by Jai Prakash and R.P. Srivastava (Hindi): This test is meant for measuring the aptitude towards teaching profession. The scale has 10 sub tests and a total of 150 items. Each sub-test contains 15 items. The test has the following areas belonging to each of the ten Sub-tests: cooperative attitude, kindness, patience, wide interest, fairness, moral character, discipline, optimism, scholarly taste and enthusiasm. Containing- 25 Reusable Booklet, 100 Ans. Sheets, Scoring Key and Manual.
- 155. Teaching Aptitude Test Battery** by Shamim Karim & A.K. Dixit (Hindi): No. of items are 80. Age group 19 to 33 years.
 (a) Test Booklets (a pkt. of 25)
 (b) Answer sheets (a pkt. of 100)
 (c) Manual
- 156. Teaching Aptitude Scale** by Sanjay Vohra (English): This test has 119 items. It measures aptitude in eight areas: communication, intelligence, maturity, perceptiveness, persistence receptiveness, social warmth and teaching interest. This test is for teachers and takes 40 min to complete.
 a) Reusable Booklets (Pkt. of 25)
 b) Answer Sheets (Pkt. of 100)
 c) Profile Sheets (Pkt. of 100)
 d) Scoring Key
 e) Manual
- 157. Duncan's Sales Aptitude Test** (Indian adaptation) by Sanjay Vohra (English): This test has been designed to help in appraising sales ability, potential in selecting sales personnel.  b) Manual
 c) Scoring Key
- 192. Group Test of Intelligence** by Prayag Mehta (Hindi):
- 193. Davids Battery of Differential Abilities** by Sanjay Vohara (DBDA) (English) (Indian Adaptation): There are eight sub-tests in DBDA-Revised, each designed to measure a single primary ability factor. Each ability factor contributes to a measure of ability important in industrial settings, career and vocational counseling. The tests in the battery may be used individually or in a combination. The tests include, Verbal ability, Numerical ability, Spatial ability, Closure (i.e., Perceptual completion ability), Mechanical ability, Psychomotor ability, Reasoning ability and Clerical ability. This test is for 14 years and above and takes about 60 min to complete. 10 R.B. Each 10x8=80, 100 Answer Sheet, 100 ability Graph Sheet, 1 Set Scoring Keys & one Manual.
- 194. Culturefair (Free) Intelligence Scale** Indian Print by Kapoor, Rao & Singh/Cattell and Cattell (Indian Adaptation): Minimise cultural bias. These may be administered individually or in a group. They may be used to identify learning problems of individuals and assess applicant's potential to perform job relevant tasks.
 (a) **Scale I (English)** (CFIS-I): For 4 to 8 years and older retardates. Time - 25 min. Norms Mental age and I.Q.
 (b) **Scale II (English/Hindi)** (CFIS-II E): For 8 to 14 years and average I.Q. Adults. It contains four sub tests involving different perceptual tasks. Completing series, classifying, solving matrices and evaluating conditions. Time taken 15 min.
- (C) Scale III (English/Hindi)** (CFIS-III E): For 14 years and above, i.e., senior secondary, college and high I.Q. adults. By employing four distinct tasks, the composite intelligence measure avoids reliance on a single skill. The scale is recommended when testing better educated or more intelligent individuals, because of the higher difficulties level of items and a greater refinement in the higher intelligence ranges.
- 195. Developmental Screening Test** by J. Bharat Raj: It is designed to measure mental development of children from 0 to 15 years.
- 196. Developmental Assessment Scale** for Indian Infants (DASII)—Revision of 1970 Baroda Norms from Birth to 35 months on BSID-RF-61 with Indigeneous Materials.
- 197. Gessells Drawing Test of Intelligence** by S. Venkatesan: A test of intelligence for Indian children with mental retardation hearing impairment and other development disabilities. Age range 18 months to 144 months.
- 198. Bhatia Battery Performance Test of Intelligence** by C.M. Bhatia: Age 11 to 16 years.
- 199. Intelligence Testing** by M.C. Joshi (**Book**)
- 200. Indian Adpatation of Binet-Simon Scale** (1960) by S.P. Kulshrestha
- 201. Indian Adpatation of Weschler Adult (Performance) Intelligence Scale** by P. Ramlingamswami: Age 16+
- 202. Indian Adpatation of Weschler Children Intelligence Scale** by Mallin's: age 5 to 15 years.
- 203. Stanford Binet Test of Intelligence** by S.K.Kulshrestha: (Indian Adpatation) Age 3.5 to 14 years. Manual in Hindi.
- 204. Binet Kamat Test of Intelligence** (BKT): Complete kit (cards are in Marathi & Kannada). Age group 3 to 16 years.
- 205. Binet Simon Scale** Hindi Adaptation

- (BSSHA–K): Manual in Hindi. Age group 2½ to 18 years.
- 206. Alexander's Pass Along Test:** Age 10+ years
Complete set with duco painted material and design cards contained in a wooden or plastic box with Record Sheets (pads of 50) and manual.
- 207. Cube Construction Test:** Complete set with Duco painted material and models in wooden or plastic box with record sheets (pad of 50 each) with Manual
- 208. Koh's Block Design Test:** Age 10+ years.
Complete set with Duco painted material and 17 design cards in plastic box with record sheets (pads of 50 each) and Manual.
- 209. Knox's Cubes:** Age 4 to 19 years. Duco painted 1"x1"x1" size with instruction sheet.
- 210. Manikin Test:** Six pieces representing six major parts of the human body to be fitted together to make a conventionalized figure of a man.
- 211. Hand Test:** Same principles for fitting parts to make a hand.
- 212. Head Test:** Same principles for fitting parts to make a head.
- 213. Two Figure Form Board with Manual:** In this form board a square and a cross each divided into four pieces to be fitted together with nine pieces. The test is used as a puzzle test for the subject.
- 214. Dearborn Form Board with Manual:** Contains the form board with 12 designs of different types. Two wooden blocks used as stimuli are to be placed in them. Measures efficiency skill.
- 215. Pintner-Patterson Five Figures** by Rudolf Pintner and Patterson: With manual. Contains eleven wooden blocks and five figures. The blocks are to be fitted in figures. May be used to measure quick performance and learning.
- 216. The Porteus Maze Test** by S.D. Porteus: Non Verbal. Age wise. For ages 3-4, 5-6, 7-8, 9-10, 11-12, 14, 15 and upward. No time limit.
- (a) Mazes: The test consists of twelve mazes eleven for children, graded in difficulty from 2-14 years (excluding 13 years), and one for 15 years and upward.
- (b) A pad consists of 100 of any one of the above mazes.
- (c) Scoring Sheets (pad of 100)
- (d) Manual
- 217. Casuist Form Board:** Twelve pieces to be fitted into four recesses.
- 218. Seguin Form Board with Manual:** Age 3 to 11 years. This form board contains ten recesses. The pieces to be used are removed by the tester and the subject is asked to put them back as fast as he can. Three trials are allowed and the fastest time required by the subject to fit the pieces into recesses becomes S's score. One of the earliest form boards, this is still very widely used. Teak wood make with fine finish. Pieces into recesses becomes S's score.
- 219. Healy's Form Board:**
- 220. Seguin-Goddard Form Board:** With Sylvester's extension.
- 221. Pintner-Patterson Short Scale of Performance Test:** by Rudolf Pintner & Patterson: This scale comprises 10 sub-tests and is useful for retesting or such other purposes. Complete with materials for all 10 sub-tests.
- 222. Test for Vocabulary Measurement** by C.B. Dwivedi (Hindi/English):
(a) Test Booklets (A pkt. of 100)
(b) Manual
- 223. General Mental Alterness for Secondary Level** by Sudha Kumari & Shafeeqa Bano (Hindi): In this test 44 items based on arithmetic reasoning, definitions, number series and same in opposite. For IX & X class.
(a) Test Booklets (a pkt. of 100)
(b) Manual

12. Concept Formation Tests

224. **Hanfmann-Kasanin Concept Formation Test:** Consists of 22 properly coloured wooden blocks. The blocks consist of 5 different colours, 2 different heights and sizes and six different shades. Supplied with a box.
225. **Inductive Reassigning Test** by D.N. Sansalwal (Hindi):
(a) Test Booklets (A pkt. of 100)
(b) Manual
226. **Reasoning Ability Test (RAT-D)** by L. N. Dubey (Hindi): This Test consists 60 Items. For 12 to 17 years students of either sex.
237. **Concept Formation (Abstraction Test):** A set of 24 cards with instruction sheets.
(a) Cards (A set of 24)
(b) Instruction Sheets
228. **Verbal Concept Formation Test** (Hindi/English) Similarity Test.
(a) A pad of 100
(b) Instruction Sheets

The dimensions measured are: adaptability, achievement, motivation, boldness, competitiveness, enthusiasm, general ability, guilt proneness, imagination, innovation, leadership, maturity, self-control, sensitivity, shrewdness, self-sufficiency, suspiciousness, social warmth, and tension. This test is for 18 years and above, and takes about 45 min to complete.
 a) Handbook
 b) Reusable Booklet (Pkt. of 25)
 c) Profile sheets (Pkt. of 100)
 d) Answer Sheet (Pkt. of 100)
 e) Scoring keys
B) MAP - Form T (Teenagers) (Hindi/English): It measures 20 primary dimensions of personality. Counselors and school psychologists use Form-T to advise school or college students, in spotting the potential dropouts, personality disorders, low achievers, etc. The dimensions measured are - adaptability, academic achievement, boldness, competitiveness, creativity, enthusiasm, excitability, general ability, guilt proneness, individualism, innovation, leadership, maturity, mental health, morality, self-control, sensitivity, self-sufficiency, social warmth and tension. This test is for 12-18 years, and takes about 45 min.
 a) Handbook
 b) Reusable Booklet (Pkt. of 25)
 c) Profile sheets (Pkt. of 100)
 d) Answer Sheet (Pkt. of 100)
 e) Scoring keys
C) MAP Scales - Form C (Children) (English): It measures 20 primary dimensions of personality and is useful in predicting and evaluating the course of personal, social and academic development of a child. The dimensions included are: adaptability, academic performance, boldness, competition, creativity, curiosity, enthusiasm, excitability, general ability, guilt proneness, individualism, indepen-

dence, leadership maturity, mental health, morality, self-control, sensitivity, social warmth and tension. This test is for 7-11 years, and takes about 45 min.

- a) Handbook
- b) Reusable Booklet (Pkt. of 25)
- c) Profile sheets (Pkt. of 100)
- d) Answer Sheet (Pkt. of 100)
- e) Scoring keys

D) MAP Scales - Form P (Primary)

(English): The Form P enables objective personality assessment of the child. Since the subjects are too young to read the questions, the questionnaire is read by the counselor/teacher. The responses are marked on the booklet. It measures 10 personality dimensions which include: boldness, competitive, excitability, emotional stability, general ability, guilt proneness, morality, sensitivity social warmth and tension. For age 4-7 years, takes 45 min to complete.

- a) Handbook
- b) Consumable Booklet (Pkt. of 100)
- c) Profile sheets (Pkt. of 100)
- d) Scoring keys

15. Situational and Projective Tests

338. Sack's Sentence Completion (Hindi/English): No. of items are 60 (2005)

- (a) Category (A pkt. of 100)
- (b) Report (a pkt. of 100)
- (c) Manual

339. Sentence Completion Test by L.N. Dubey & Archana Dubey (Hindi/English): This test consists of 50 items. It measures certain personality traits — sociability, self confidence and ambitions. All the sentences are so framed that they lead to reveal the positive or negative aspects related to one's trait. Age range 14 to 19 years.

- (a) Test Booklets (A pkt. of 100)
- (b) Manual

340. Draw-A-Man Test by Pramila Pathak (Age 2.5 to 16 years):

341. Thematic Apperception Test with Manual by H.A. Murray (Original)(Age 14+ years):

342. T.A.T. Need Pattern Record Sheet (pad of 50):

343. Indian Adpatation of Children Apperception Test with Manual: (CAT) by Uma Choudhary. Age 4 to 10 year.

344. Indian Adpatation of Thematic Apperception Test with Manual (TAT) by Uma choudhary: Age 15+ No. of cards 14 with one blank:

345. Indian Adpatation of Thematic Apperception Test with Manual by L.P. Mehrotra:

346. Indian Adaptation of Senior Apperception Test (SAT): by Uma Choudhary:

347. Children Apperception Test by Bellack & Bellack (Original) (CAT): The CAT consists of ten pictures depicting animals in various situations. It is used with children of both the sexes primarily between the ages of 3 to 10 for maximal usefulness. It is designed to facilitate understanding of a child's relationship to his most important figures and drives.

- a) Animal Figure
- b) Human Figure
- c) Supplementary

348. Rorschach Individual Record Blank: (A pkt.of 100)

349. Rorschach Inkblot Test: With Psychodiagnostic Plates, Record blank, Location chart and Manual by Herman Rorschach.

350. Rorschach Manual by John E. Exner.

351. Indian Adaptation of Motivation Analysis Test by S.D. Kapoor & R.N. Singh (Hindi): All details as follows.

352. Motivation Analysis Test: (MAT-CHS) by R. B. Cattell, J. L. Horn & A. B. Sweney (English, Indian Print): MAT is an objective device measuring adult motivational pattern. The test provides measures of 10 important

- comfort, social and achievement needs. Five are basic drives or ergs - caution, sex, self-assertion, aggressiveness, and self-indulgence. Another five are interests that develop and mature through learning experience known as sentiments career, affection, dependency, responsibility and self-fulfilment. For each of the 10 areas, scores measure drive (or need), satisfaction, degree of conflict, and total motivation strength (or Interest). It is meant for higher secondary or Adult or 16+. It has 208 items.
- 353. A.A.P.A.S. Motive Test** (For Adolescent) by A. Kureshi: AAPAS Motive Test is a device for the objective assessment of such motives as achievement, affiliation, power, aggression and security. This test consists of pictures to be used as stimuli, direction relating to administration of the test and scoring scheme for the above mentioned motives. The reliability and validity of the test have been reported to be fairly high.
(a) Test Cards Set
(b) Manual of Instructions
(c) Scoring Sheet (A pad of 50)
- 354. Indian Adpatation of Rosenzweig Picture Frustration Test (Adult)** by Udai Pareek (Hindi/English): This very widely used clinical test uses some pictures which arouse frustration.
(a) Test Booklets (A pkt. of 25)
(b) Record Sheets (A pkt. of 100)
(c) Manual
- 355. Indian Adpatation of Rosenzweig Picture Frustration Test (Children)** by Udai Pareek: (Hindi/English): For Age group 4 to 13.
(a) Test Booklets (a pkt. of 20)
(b) Record Sheets (a pkt. of 50)
(c) Manual
- 356. Jung's Word Association Test** (Hindi): Adaptation of Jung's word list with space for recording responses, analysing laws of association, R.T., and remarks, etc. Useful for complex detection (A pad of 50).
- 357. Kent-Rosanoff's Word Association Test:** Hindi adaptation of Kent-Rosanoff's word list. Space provided for recording responses, laws of association, R-T and remarks. Useful for complex detection (A pad of 50).
- 358. Manual for Word Association Test** by Meera Joshi (Hindi): Types of word and associations and techniques of analyses of (1) Jung's (2) Well's (3) Woodworth's.
- 359. Controlled Association Test** (Hindi/English) Both with space for recording responses, R.T. & Remarks.
(a) Form A (A pad of 100)
(b) Form B (A pad of 100)
- 360. Indo-African EFT Test** by D. Sinha:
(a) Test Cards (Set of 20 cards)
(b) Manual
(c) Score Sheets (A pkt. of 100)
- 361. Story-Pictorial E. F. T.** by D. Sinha: Psychological differentiation is a very popular construct in cross-cultural research. Using the rationale of Witkin's Embedded Figures Test (EFT), Story Pictorial EFT and Indo-African EFT have been developed. These are culturally appropriate tests of cognitive style not only suitable for children but can be used on unsophisticated, illiterate rural population as also on urban samples.
(a) Test cards (Set of 11 cards)
(b) Manual
(c) Score Sheets for multiple item cards (A pkt of 100)
- 362. Child-Abuse Check List** by Sushma Pandey (Hindi): Age 6 to 18 years. No. of Items 120. Four areas measure — Physical abuse, Psychological abuse, sexual abuse & Child neglect.
(a) Test Booklets (A pkt. of 100)
(b) Manual
- 363. Marital Conflict Questionnaire** by Sushma Pandey (Hindi): No. of items 80. Age range

20-49 years.

(a) Test Booklets (A pkt. of 100)

(b) Manual

16. Motor-Perceptual Skills Test

- 364. Peer Pressure Scale** by Kusum Tyagi & Nidhi Gupta (Hindi/English): Age group 12-19 year. No. of items 50. This test measures 5 areas - 1. Interpersonal Relationship, 2. Agreeableness, 3. Economic Pressure, 4. Academic/Scholastic and 5. Conscientiousness.
(a) Test Booklets (a pkt. of 100)
(b) Manual
- 365. O'Connor's Finger Dexterity Test** (Wooden) (Laffaye Model): This finger dexterity Test consists of a shallow well, below which are 100 holes about 3/16" in diameter arranged in ten rows of ten holes each spaced 1/2" apart. Into these holes the testee can insert upto three pins each 1" long and about 1/16" in diameter. This test has been found useful as a predictor wherever rapid manipulation of small objects is important such as in the assembly of armatures, miniature parts, clocks, watches and machine windings. Complete with 300 pins. (With Manual).
- 366. Tweezer Type Dexterity Test:** Teak wood base with rust proof metal square top with 100 holes. 100 needles provided with a fine tweezer.
- 367. Manual Dexterity Test:** Plywood made with sockets and 60 pegs. Painted or polished and fine finish.
- 368. Finger Dexterity Test :** Box type.
- 369. Stromberg's Dexterity Test:** The test uses three sequences of coloured holes and the subject is required to insert the blocks of same colour in same holes. The blocks are arranged in specific order and the subject is required to pick up the blocks in a particular-pattern. All teak wood with fine finish.
- 370. Bennet Hand Tool Dexterity Test:** The test provides a measure of proficiency in using ordinary mechanic tools. The manipulative skill rather than the mechanical information is measured. The task requires removing all the nuts and bolts from left upright and mount them on right upright in a prescribed sequence. Total time required gives the scores. Ideal for studying the hand tool dexterity.
- 371. Ring Inserting Test:** This test consists of a saucer, 50 rings, an inserting rod and pincette. In this time limiting method of 1 min 30 sec the tester counts the number of ring inserted on the rod. In this case, it is convenient to count them by the scale. One graduation is the thickness of ring.
- 372. Cord Binding Test:** This device is designed to measure the speed of movement and adjustability of hand or to examine the speed of movement and adjustability of hand tool. Examine the speed of movement and muscle coordination of arm and finger. (The subject is required to bind the cord around the rods methodically according to the white line printed on the board from the starting position to the end as speedily as possible. The time required from the beginning to the end for the above operation is measured. The cord must be crossed one time around each rod but the operation must be performed only with the preferred hand. The time is measured by a stop-watch and the shortest obtained time is deemed as central value.)
- 373. Threading Test:** The device is employed in testing the speed and dexterity in finger movement. The time required to pass a thread through an 'eye' of 33 rods, three in a row and 11 rows, is measured. Quality of performance can also be checked easily.
- 374. Steadiness Tester (Hole Type):** This instrument has been designed to measure one aspect of the psychomotor phenomenon of steadiness. Nine holes gradually diminishing in size are used. The subject's task is to hold

the stylus in the hole without touching the side. Analysis can then be made of the subject's total score time for all nine holes or separate analysis can be made for each of the hole.

(a) Electrically operated

- 375. Phepple Steadiness Tester** (T.K.K. Japan Model): This is a stabilometer for arm in which there is groove on the panel with a stylus in a specified period of time. When the stylus makes a contact with the edge of the groove, light buzzer is sounded. This unit may be used with a counter.
- 376. Lifting Control Steadiness Tester:** In this test, movement balance of finger in space is examined. The subject is required to lift a weight and to move it along a groove 40 cm in length. 0.3 cm play upward and downward only is permitted and the weight cannot be moved along otherwise. To prevent the familiarity with the same weight, that test is performed by employing three different weights of 50, 100 and 200g by turns.
- 377. Tapping Test** (T.K.K. Japan Model): This device is used for testing the speed of tapping by hand and determining whether a subject is left-hander or a right-hander. Tapping frequency with which the subject taps within a given period of time is shown on a counter digitally.
- 378. Match Board** (T.K.K. Japan Model): This instrument is employed in measuring the skill and dexterity in the movement of fingers. This is used not only for observing a subject's manual dexterity or his skill in using his fingers but also for studying his attention span. Dexterity differences in working from the left to right and vice versa can also be measured.
- 379. Grooved Pegboard** (Lafayette U.S.A. Model): A manipulative dexterity test, containing 25 holes with randomly positioned slot. Pegs, which have an edge along one side, must be rotated to match the hole before they can be inserted. This test requires more complex visual-motor coordination than most pegboards. In addition to its uses in the student lab and uses in screening procedures in industry, this pegboard has been found of considerable help in evaluating lateralized brain damage.
- 380. Lafayette Pegboard:** Designed to measure a timed unilateral motor response. Subject is to place 25 pegs in round holes as quickly as possible across the rows. Score should improve with successive trials. Norms are not included.
- 381. Tactile Form Recognition Test:** By using touch, the blindfolded subject tries to match a shape in one hand to a shape touched on the board with the other hand.
- 382. Complete Minnesota Dexterity Test:** This test measures simple hand-eye coordination and gross motor skills. It consists of a battery of five tests: placing, turning, displacing, one-hand turning and placing, and two-hand turning and placing. This test comes complete with two folding pegboards, 60 blocks.
- 383. Roeder Manipulative Aptitude Test:** This test measures hand, arm and finger dexterity and speed. It is designed to test individuals and students for employment. The test has two parts, sorting and assembling. Test comes complete with instruction manual, norms and record blanks.
- 384. Whipples Tapping Board:** This apparatus demonstrates one of the most elementary psychomotor skills. The task is simply to tap the stainless steel plates as rapidly as possible. Designed for versatility and durability, this unit may be used to demonstrate a number of important principles.
- 385. Whipples Tracing Board:** Well calibrated metal strips are mounted on a polished wooden plate having binding post and glass floor. Subject moves stylus in between the two converging strips. Supplied with ebonite

handle stylus.

- 386. Whipples Target Board:** To test speed and accuracy of aiming, subject marks ten irregular arranged crosses. Targets are pinned on the board. Height of the board can be adjusted within 24" when fixed on a wall.
- 387. Healy's Peg Board:** A specially made light weight laminated board 15"x12" fitted with metal strip having 56 holes in two rows. Fitted also with two drawers as per specifications. Supplied with 60 standard size pins and a box.
- 388. Two Hand Coordination Test** (Electrically operated): Used for teaming experiments of two hand coordination, consists of mechanical device permitting horizontal and vertical movements of a pin or a pencil through slotted design. Time and errors are counted. Using impulse counter cumulative record of errors can be assessed.
- 389. Minnesota Rate of Placing and Turning Test (Box Type):** This widely used test is designed for school, business and industry. It measures the so called native speed capacity of simple but rather rapid coordination of eye-hand-finger movement. This is particularly applicable in shop and office occupations which require quick movement in the handling of simple tools and production materials without differentiating different sizes and shapes. This performance test is, therefore, ideally suited for semi-skilled assembly, packers, bank personnel, clerical personnel, etc.
- 390. Two Hand Coordination Test** (Manually operated): This is a simple device having two circles equally split into four cravices. The subject is required to learn it either as a single task or double task problem. Time and errors are used as response measures. Other qualities as above.
- 391. Minnesota Block Pecking Test:** This test consists of 147 wooden cubes and a box. The cubes are to be pecked, thereby providing
- sample opportunity of studying the motor-preceptual skills.
- 392. Minnesota Rate of Placing & Turning Test** (Tray Type): With a polished wooden tray. Other qualities as above. Stop watch also needed.
- 393. Eye Hand Co-ordination Test** (Drever & Collins Model): A semi-circular hand plywood is covered on one side by an iron sheet. A scale is mounted on which the rider is moved on both the sides except the blind zones. The subject sits with his chin resting on chin stand. Fine finish with pointer and the rider.
- 394. Speed and Accuracy Test** (Hindi/English):
(a) Numerical Sheets (A pad of 100)
(b) Alphabetical Sheets (A pad of 100)
(c) Manual
- 395. Physical Health Awareness Questionnaire for Elementry Students** by Sunita Singh (Hindi): The Questionnaire contains 30 items from different areas related to physical health, i.e., balanced diet, food habit, cleanliness, sanitation, yoga and excercises. It has high reliabilities of split half. The validity has been ascertained against the criterion of teachers' judgement.
(a) Test Booklets (a pkt. of 100)
(b) Manual

17. Social Phenomena/Attitude Tests

- 396. Vineland Social Maturity Scale** by Malin (English):
a) Test Booklets (a pkt. of 100)
b) Manual
- 397. Social Maturity Scale** by J. Bharatraj (English): For age level from 0 to 15 years.
a) Test Booklets (a pkt. of 100)
b) Manual
- 398. Social Maturity** by Roma Pal (Hindi/

- English): For adults. Area covered - 1. Self-confidence, 2. Self-direction, 3. Social feeling, 4. Productivity, 5. Social & Human values.
 (a) Test Booklets (a pkt. of 100)
 (b) Manual
- 399. *Social Alienation Scale*** (for Secondary school students) by Meenakshi Prasad & S.K. Shukla (Hindi):
 (a) Test Booklets (A pkt. of 20)
 (b) Answer sheets (A pkt. of 100)
 (c) Manual
- 400. *Social Cognition*** by N.K. Jain (Hindi/English):
 (a) Stimulus material (A pkt. of 100)
 (b) Scoring template (A pkt. of 100)
 (c) Manual
- 401. *Social Support Scale*** by K.B. Verma & Madhu Asthana (Hindi/English): No. of items are 35. The scale provides a total social support score as well as the score on the following three dimensions - 1. Emotional Support, 2. Informational support, 3. Instrumental support. For Adult Population.
 (a) Manual
 (b) Test Booklets (A pkt. of 100)
- 402. *P.G.I. Social Support Questionnaire*** by S.K. Verma, P. Kulhara & Ritu Nehra (Hindi): No. of items 19. This questionnaire is independent of gender, marital status, occupational status, education status, income, religion and family type.
 (a) Test Sheets (A pkt. of 100)
 (b) Manual
- 403. *A Study of Social Perception /Attributional Style Test*** by C.B. Dwivedi (Hindi/English):
 (a) Emotional Expressivity Scale (A pkt. of 100)
 (b) Attributional Style Test (A pkt. of 100)
 (c) Manual
- 404. *Social Conformity Scale***: by Dhapola & Singh (Hindi/English):
 (a) Test Booklet (A pkt. of 100)
 (b) Manual.
- 405. *Bogardus Social Distance Scale*** by M.C. Joshi (Hindi/English):
 (a) Test Sheets (A pkt. of 100)
 (b) Manual
- 406. *Social Distance Inventory***, 2007 by S.K. Srivastava & Veena Katyal: (Hindi):
- 407. *Simmons Social Deviance Scale based on Bogardus Social Distance Scale*** by M.C. Joshi (Hindi/English):
 (a) Test Booklets (A pkt. of 100)
 (b) Manual
- 408. *A Study of Social Facilitation*** by N. K. Jain (Hindi/English):
 (a) Test Sheets of simple tasks (pkt. of 100)
 (b) Manual
 (c) Test Sheets of complex tasks (pkt. of 100)
- 409. *Social Transmission of Story*** by N.K. Jain (Hindi/English):
 (a) Stimulus material (A pkt. of 100)
 (b) Scoring template (A pkt. of 100)
 (c) Manual
- 410. *Social Conformity /Group Conformity*** by C.B. Dwivedi: All three following sets of card will be required for conducting this experiment.
 (a) Test cards (set A)
 (b) Test cards (set B)
 (c) Test cards (set C)
 (d) Manual
 (e) Record sheets (A pkt. of 100)
- 411. *Socio-Economic Status Scale*** (1991) (Urban and Rural) (Hindi) by B.K. Singh, S. Sharma (urban) and S. Suman (Rural): Both the urban as well as rural forms consist of 25 multiple-choice items each. The items try to explore the social, educational occupational and income expenditure characteristics of families. Direct questions on amount of income have been avoided and emphasis has been placed on material possessions and expenditures. The tests have been found reliable and valid. Norms have been provided.

ed. The tests are supposed to be improvements over previous other such tests.

(a) Test Booklets-Rural Form (A pkt. of 100)

(b) Test Booklets-Urban Form (A pkt of 100)

(c) Manual

412. Kalliath's Socio Economic Status Scale by R.P. Kalliath (Hindi/English): (1999) Any age group 10 years onwards. The following factors are measured - 1. Type and nature of the family, 2. Type of accommodation facilities and services available in the home, 3. Articles possessed, 4. Total monthly income of the family, 5. Literacy levels of parents/spouse, 6. Occupation of parents/spouse, 7. Exposure to mass media, 8. Library, club membership, 9. Interaction among family members, 10. Holidaying habits of the family.

(a) Manual

(b) Test Booklets (A pkt. of 100)

(c) Scoring Key

413. Environmental Awareness Questionnaire by Sunita Singh (Hindi/English): For Secondary level to P.G. level. The questionnaire contains 32 items from different areas related to measuring of environment, cause and effect of pollution and prevention. It has high reliability (0.87). The validity has been ensured through experts opinion. Percentage score norms have been provided.

(a) Test Booklets (a pkt. of 100)

(b) Manual

414. Learning Environment Scale by Mihir Kumar Mallick & Simranjit Kaur (Hindi/English): For Class XI and XII. No. of item 48. The Learning Environment Scale has two subscales namely - learning environment at home and at school. Dimensions of each subscale are - 1: parental control and encouragement, independence and conformity, parental care and nurturance, recreational orientation and learning through computer technology. subscale 2 : cognitive

encouragement, teaching through technology reward and punishment, physical infrastructure and peer influence on learning.

a) Test Booklets (a pkt. of 100)

b) Manual

415. Environmental Value Scale by Madhu Kapani & Minakshi Biswal (Hindi/English): No. of items 40. Age group of 15 to 25 years. In this test the researchers mainly consider environmental values as protection, preservation, economical uses of resources, sympathy towards animals, neat and tidy way of living.

(a) Test Booklets (A pkt. of 100)

(b) Manual

416. Environmental Awareness Scale by Madhu Kapani & Minakshi Biswal (Hindi/English): No. of items 40. This is a useful tool to assess environmental awareness of an individual or a group of 15-25. It can be used for any behavioural research concerning environmental awareness, survey purpose or/ for comparison of population. It gives a quick measure of environmental awareness for experimental purposes. It is suitable for group administration as well as for individual testing. The test is developed and standardized on Indian sample.

(a) Test Booklets (A pkt. of 100)

(b) Manual

417. Environmental Responsibility Scale by Madhu Kapani & Minakshi Biswal (Hindi/English): No. of items 40. Age group 15-25 years. Four dimensions of environmental problems in the contemporary society have been identified. These are - Physical, Economic and Social consequences, Geographical scale, Time scale and Socioeconomic system.

(a) Test Booklets (A pkt. of 100)

(b) Manual

418. Environment Attitude Scale (EAS) by Sarla Pandey & Anurag Mishra (Hindi): No.

of items 60. For students, teachers, guardians and also different agency personnels. The scale is constituted with five major components - Attitude towards environmental learning, Attitude towards necessity of environmental learning, Attitude towards pollution and its effects on human beings, Attitude towards inclusion of environmental education in curriculum and Attitude towards environmental conservation.

- (a) Test Booklets (A pkt. of 100)
- (b) Manual

419. Family Environment Scale by M.C. Joshi & O.P.R. Vyas (Hindi): This test measures 10 areas for 3 dimensions. They are - 1. Relationship-cohesion, Expressiveness, conflict. 2. Personal growth-independence, achievement orientation, intellectual cultural orientation, active recreational orientation, moral religious emphasis. 3. System maintenance-organization, control. No. of items 90.

- (a) Test Booklets (A pkt. of 20)
- (b) Answer sheets (A pkt. of 100)
- (c) Manual
- (d) Scoring Key

420. Home Environment Inventory (HEI-MK) by K.S. Mishra (Hindi/English): Parent Child Relationship and Home Environment Scales. It contains 100 items related to ten dimensions of home environment - control, protectiveness, punishment, conformity, social isolation, reward, deprivation of privileges, nurturance, rejection and permissiveness. Each dimension has ten items. Scoring is simple. It is reliable and valid instrument with standardization of school going children of Intermediate class.

- (a) Test Booklets (A pkt. of 100)
- (b) Manual

421. Class-Room Environment Scale by M.C. Joshi & O.P.R. Vyas (Hindi): Nine areas are covered in this test - involvement, affiliation, teacher support, task orientation, com-

petition, order and organization, rule clarity, teacher control, innovation. No. of items are 90.

- (a) Test Booklets (A pkt. of 20)
- (b) Answer Sheets (A pkt. of 100)
- (c) Manual
- (d) Scoring Key

422. Medication Attitude Scale by V.K. Verma & S.K. Verma (Hindi/English):

- (a) Test sheets (A pkt. of 100)
- (b) Manual

423. National Intergration Scale by Priyanka Mishra & Reeta Kumari (Hindi): No. of items 40 for Class 10+2.

- (a) Test Booklets (A pkt. of 100)
- (b) Manual

424. Inter Personal Attraction by Ripunjay Deo Singh & Vikas Kumar (Hindi/English):

No. of items are 34. Dimension/Factors are - 1. Interactional factors, 2. Personal factors, 3. Personality factors, 4. Physical factors, 5. Situational factors, 6. Economic factors.

- (a) Test Booklets (A pkt. of 100)
- (b) Manual

425. Rumour Analysis by N.K. Jain (Hindi/English):

- (a) Stimulus Material (A pkt. of 100)
- (b) Scoring Template (A pkt. of 100)
- (c) Manual

426. Despande's Modernity Scale by Shashikala Despande (English):

- (a) Test Booklets (A pkt. of 100)
- (b) Manual

427. Individual Modernity Scale by Kerawaala & R.P. Kalliath (English):

- (a) Reusable Test Booklets (A pkt. of 20)
- (b) Answer Sheets (A pkt. of 100)

First five sheets are intended to be for studying the general nature of the phenomenon. Next five sheets require the subjects to aspire before they work and write it at the top of the page. Final five sheets provide the subjects with performance of a similar group.
 (a) Test Booklets (A pkt. of 100)
 (b) Manual
- 451. Prestige Suggestion Test** by Meera Joshi & Jagdish Pandey (Hindi/English): Ten poems are presented without poet's names attached with them, which are to be adjudged by subjects as to their first, second and subsequent, likings. The same poems are again presented with the names of the poets. The differences in judgements due to the name affixing gives the prestige suggestion score. Fully illustrated in manual.
 (a) Test Sheet Form A (A pkt. of 100)

(b) Test Sheet Form B (A pkt. of 100)

(c) Manual

452. Sociometric Choice Test by Meera Joshi & Jagdish Pandey (Hindi/English): This test records interpersonal attractions among the members of a group. The test should be used with a group of persons who have been together long enough to be acquainted with one another, such as in a class, in a factory, club, etc. Each individual is asked to choose five group members with whom he would like most and also dislike most to study, play, sit or work, lunch and walk. The names are to be written according to their choice positions. The choices may be interpreted either in manner of a sociogram or on the basis of ratings on the preference scale continuum.

(a) Test Booklets (A pkt. of 100)

453. Co-operation and Competition Test by Meera Joshi & Jagdish Pandey (Hindi/English): This test comprises 13 work-sheets one for practice and remaining for studying the phenomena of cooperation and competition. Six periods are for cooperation and same for competition. The two behaviours have been discriminated by the instructions. The test is also suitable for group situations. The averages of cooperation situations and competition situations per min should be compared to see the effect of these behaviours.

a) Test Booklets (A pkt. of 100)

454. Intergroup Discrimination Matrices by C.B. Dwivedi (Hindi): These matrices are designed for studying the intergroup discrimination phenomenon. The subjects should be divided on the basis of some preference tests and then the matrices should be presented to them individually.

(a) Test Matrices (A pkt. of 100)

(b) Manual

455. Vocational Preference Test by Meera Joshi & Jagdish Pandey (Hindi/English): This

test measures the vocational preference and is more suitable for administration in groups. Names of 15 prominent vocations are printed in 105 pairs. The method of paired comparison for noting the preferences has been adopted. The preferences are accordingly to be done between each one of the 15 vocations. Total preference score for each one of the 15 vocations has to be interpreted with reference to their relative hierarchy. They may also be interpreted in terms of the relative distances between vocations. The rho-correlation provides basis of comparison of two groups. Complete directions and hints for interpretations have been provided.

(a) Test Sheets (A pkt. of 100)

(b) Manual

456. Stereotype Measurement by Meera Joshi & Jagdish Pandey (Hindi/English): This test is used for measuring the stereotypes developed for citizen of 10 countries.

Twenty personality traits are to be attributed among the nationals of each of the ten countries, five for each national. The experiment is suitable for administration in groups. The selection of traits for citizens of respective countries will indicate the degree of stereotypes about them.

(a) Tests Sheets (A pkt. of 100)

(b) Manual

457. Dress and Personality Judgement Test

by M.M. Joshi & J. Pandey (Hindi/English): This test uses three figures and the subjects are required to write ten personality traits after looking at each of the figures. The traits are to be measured on typical dress and personality relationship and hence the judgement scores noted on five-point scale offer valid criterion of measuring them. Directions for analysing the data into quantitative and qualitative fashions have been given. The test may be used in a group situation for more balanced results.

 (b) Cards -II
 (c) Test Booklets (a pkt. of 100)
 (d) Manual
- 467. Indian Adaptation of Hutt's Bender Gestalt Test for Adults** by C.B. Dwivedi & Subhara Banerjee: This adaptation provides scoring instructions for 17 pathological and for the Adience Abience scale. It is highly useful for a quick understanding and screening of psychopathological cases. Normative data

have been provided for the aforementioned 17 pathological and adience-abience scale separately.

- (a) Manual
- (b) Test Cards (per set)
- (c) Individual Response sheet (A pkt. of 100)
- (d) Test Booklets (a pkt. of 100)

- 468. Bender Gestalt Test for Children** by C.B. Dwivedi: This test consists of nine designs which are presented one at a time and the subject is asked to copy them as they are presented. The brief and nonthreatening copying task is used to reveal perceptual distortions suggesting brain damage, developmental retardation and personality characteristics.
- (a) Manual
 - (b) Test Cards (per set)
 - (c) Test Sheets (A pkt. of 100)
 - (d) Indicators for Emotionality (a pkt. of 100)

- 469. Comprehensive Neuro-Psychological Battery (Adult)** by Surya Gupta based on Luria Neuropsychological Battery of diagnosis of an organic brain dysfunction. This battery contains 200 items in Hindi through 13 sub-clinical scales - motor, tactile, receptive speech, expressive speech, reading, writing, arithmetic, memory, intellectual processes, right hemisphere, left hemisphere and pathognomosis. The reliability was determined by test-retest, interrater and internal consistency methods and it was reported remarkably high. To validate this battery three groups normal controls, schizophrenics and brain damaged patients were employed. Norms are given in form of T-scores.

- 470. Comprehensive Neuro-Psychological Battery (Children)** by Surya Gupta:

- 471. P.G.I. Hope Scale** by S. Sharma, S.K. Jindal, D. Behera & S.K. Verma. (Hindi, 1998): No. of item are 40. Age range 19-47 years. Applicability - The test can be used with Indian, adult Hindi speaking population

wherever a measure of positive mental health is desired to be assessed. It can also be usefully employed to evaluate any intervention over a period of time. Repeated measures give comparative attitudes towards life in the form of hope. It is positively correlated with other positive measures of mental health like sense of well-being and negatively correlated with negative measures of mental health like diagnosis of an illness, physical or mental and death anxiety. It is a well standardized, reliable, valid, objective and useful tool in simple Hindi for clinical population.

- b) Manual

494. *Work Adjustment Inventory*, 1992 by O.P. Mishra & S.K. Srivastava (Hindi):

20. Accessories

495. *Balance*: Common Balance for weight-discriminating experiments. A weight box is included with the balance.

496. *Alphabetical Series*:

497. *Balance Physical*: With glass cover.

498. *Weight Box*

499. *Blind Goggles*

500. *Chin-cum-Head Rest*: Most reliable device to secure proper fixation of eyes on a target. Used in all experiments related with vision.

- (a) Wooden
- (b) Metal

501. *Cotton Pads*: For arm-rest on the table.

502. *Lead Shots*: For varying the weights.

503. *Metronome*: With Bell (Imported)

504. *Metronome*: Electronics

505. *Models*:

- a) Eye
- b) Ear
- c) Brain
- d) Spinal Cord (Vertebral Column with pelvis & femur heads)

506. *Stop Watch*: Mechanical (1/10th of Sec.)

507. *Stop Watch*: Digital, Racer:

508. *Stop clock Indian*

509. *Stamp Pad*: For tactual-or skill experiments.

510. *Ice pot*: For cold session study.

511. *Rubber Stamps*: For cold and warmth spots location for two-point limen.

512. *Wooden Screen*: Three sizes, for partial screening and complete screening.

(a) Wooden cover of 20" x 15"

(b) Wooden cover of 23" x 20"

513. *Tapping Key*

514. *Bells (6 Volts/12 Volts)*

515. *Buzzers (6 Volts/12 Volts)*

516. *Timer Imported*

517. *Dual Hand Tally Counter*: Two hand tally counters have been mounted on a convenient 11½"x8½" board. This arrangement allows for simultaneous tallying of two separate events while a paper and pencil record or calculation may be made on the paper sized support. Each counter can register upto four digits and is easily reset.

518. *Movable Switch Board*

519. *Hand Tally Counter* (Error counter):

Designed for convenient use in the hand.

This counter is operated manually by successively depressing a lever to register counts. Reset to 0000 is quickly accomplished.

520. *Impulse Counter (Error Counter)*: Electromagnetic counters. Used for error counting, trial counting, etc., in maze learning hand eye coordination, mirror-drawing and many others. 6/12 Volt D.C. reset.

521. *Log Graph paper*: A pkt. of 100

522. *Probit paper*: A pkt. of 100

523. *Arithmetical Graph Paper*: A pkt. of 100

524. *Correlation Chart*: A pkt. of 100

525. *Number Series*: A pkt. of 100
